

MAXISCAN® MODEL 1000

NEW! The new MAXISCAN® 1000 is a product with the ability to be used on any patient that requires vascular access. With a 2-stage illumination system, the MAXISCAN® has the ability to identify IV sites quickly and accurately providing atraumatic care to the patient while dramatically reducing nurse down time. This unit has all the attributes of our other transilluminators: portability with internal rechargeable batteries, proven rugged and reliable design, small size and weight, but with the added benefit of having 40% more bright white light output. The MAXISCAN® is uniquely designed for the ER, EMTs, doctor's offices, home healthcare, skilled care nursing homes, phlebotomy, IV teams, CCUs, oncology, radiology, military field hospitals, clinics, or anywhere IV insertion is required.

- **TIP NEVER GETS HOT—NO BURNS**
- **HIGH VOLUME BRILLIANT WHITE LIGHT OUTPUT**
- **HIGHLY FLEXIBLE FIBEROPTIC LIGHT PIPE**
- **RUGGED, RELIABLE DESIGN**
