

**PEDIASCAN® MODEL 100**

Small, lightweight, handheld cold light fiberoptic transilluminator for use with neonates in the NICU or for neonatal transport. Sized right for air or land transport situations, yet has the same renowned, powerful bright white light output that has given all the PEDIASCAN® units such a respected name. Designed for heavy-duty use, the internal parts are ruggedized for optimum performance and years of serve. Single stage light. Provide affordable, atraumatic care to the smallest neonate with this compact, efficient unit. You can leave the tip on the observation site as long as you need it—the tip never gets above 94 degrees Fahrenheit.

- **SMALL SIZE—GREAT FOR TRANSPORT**
- **NO BURNS! NEVER GET HOT**
- **VERY FLEXIBLE 4' LONG FIBEROPTIC LIGHT PIPE—FITS EASILY INSIDE ISOLETTES**
- **HIGH VOLUME BRILLIANT WHITE LIGHT OUTPUT**
- **EASILY INSIDE ISOLETTES**
